Preferred Location: **Delhi/NCR (Hybrid Working)**

Experience: **Minimum of 4+ years of experience as a Database Administrator, with a total of 8+ years of experience in IT roles**

Employment Type: **Full Time**

Hiring requirement: 01

Job description:

We are looking for a talented Database Administration to manage our company's system. You will be required to install and maintain the Oracle server software and related products, maintain backup policies, and regularly maintain database security.

Responsibilities:

- Install and maintain Oracle database software.
- Design, build, and implement database structures.
- Implement and maintain database security measures.
- Perform tuning and monitoring of database and application performance.
- Update systems as necessary and create data backups.
- Design databases considering both front-end and back-end user requirements.
- Handle additional tasks such as server administration, Linux administration, and SQL management.
- Should have experience in database migration and monitoring tools.

Skills & Experience Required:

- **Education:** Bachelor's degree in Computer Science, Information Technology, or related field.
- **Experience:** Minimum of 4+ years of experience as a Database Administrator, with a total of 8+ years of experience in IT roles
- In-depth knowledge of Oracle database architecture.
- Strong SQL and PL/SQL skills.
- Proficiency in operating systems Unix/Linux
- Experience with Azure/AWS technology

- Experience with database backup and recovery, performance tuning, and security.
- Minimum 2 years' experience with AWS technologies
- Excellent problem-solving and troubleshooting skills.
- Strong communication and teamwork skills.
- **Preferred:** Oracle DBA certification (e.g., Oracle Certified Professional) and familiarity with other database technologies (e.g., MySQL, PostgreSQL).
